Supported by Kyushu University, Q-AOS

What we can do for the health and well-being of women and their unborn children

Key Words

Obstetrics and Gynecology

Women

Medical system

Return-to-Work Support

Professor Emeritus

Kiyoko Kato

Faculty of Medical Sciences, Kyushu University

Birth: Miyazaki prefecture

Education:

1986.3 M.D., Medical School of Medicine, Kyushu University, Japan

1995.1 Ph.D., Medical School of Medicine, Kyushu University, Japan

POSITIONS:

1992-2009 : Medical Doctor in Medical Institute of Bioregulation, Kyushu University, Japan

2009-2012 : Associate Professor, Department of Obstetrics and Gynecology, Faculty of Medicine, Juntendo University, Japan

2012-2026 : Professor, Department of Obstetrics and Gynecology, Graduate School of Medical Sciences, Kyushu University, Japan

2026.4-present: Director Fukuoka Sannno Hospital, International University of Health and Welfare

OTHER POSITIONS:

1) Japan Society of Obstetrics and Gynecology (JSOG)
2015-2023 Editor in Chief of "Journal of Obstetrics and Gynaecology Research (JOGR)"

2023-2025: Chairperson of the Executive Board,

2) Asia and Oceania Federation of Obstetrics and Gynaecology (AOFOG)

2015-present : Executive Board member

3) Japan Society for Menopause and Women's Health (JMWHP)

2017-2023: Vice President of the Japan Society for Menopause and Women's Health (JMWHP)

Specialties :

gynecologic oncology and women's health care.

In the medical field of obstetrics and gynecology in Japan, there is an urgent need to address the regional maldistribution of doctors, support for returning to work after maternity leave, and, academically, ethical responses to personal and genetic information as comprehensive genome searches become possible. Socially, there is a mountain of issues, including problems related to non-invasive prenatal genetic testing (NIPT) and preimplantation genetic testing (PGT-A/SR, PGT-M), and sexual reproductive health/rights (SRHR). Considering these issues as a whole, the key words for the future are "adaptation to diversity" and "collaboration."

I believe that three things are important: 1) establishing a safe and secure medical system for patients, 2) increasing the number of obstetricians and gynecologists, and 3) helping physicians return to work after a leave of absence. In this lecture, I would like to consider these issues.
