

# Reorganization Overview

## ■ Establishment of "Department of Overseas Engagement"

"Department of Overseas Engagement" is established to develop and implement a system for on-site implementation of "pre- and post-university and graduate school education programs" as new programs related to issues (on-demand) for which there are strong demands in each country and region, based on the research results and international networks accumulated to date.

## ■ Reorganized into 4 clusters

Reorganized into four clusters, each with a clear mission, and established a system to set up modules for that mission using a backcasting approach.
