"Academy" activities led by young scientists ~ while reconsidering the role of scientist in our society

Chair: **Assoc. Prof. Fumihiko YOKOTA** (Research Promotion Coordinator of Q-AOS)**Associate Professor/ Executive Assistant to the President
Akihiro Kishimura**

Department of Applied Chemistry, Faculty of Engineering, Kyushu University

The National Academy in Japan is the Science Council of Japan (SCJ). Although its name has become known to the general public unexpectedly since the year before last, its activities are still not well known. Even less is known about the activities of the Young Academy of Japan (YAJ). In this seminar, I would like to introduce some of these activities and hope that they will lead to the discovery of the talent out of the next generation. Specifically, I will introduce the following:

- (1) Missions of the Science Council of Japan and activities of the Young Academy of Japan
- (2) Foundation trends of young academies in the world and Global Young Academy (GYA)
- (3) GYA Annual General Meeting 2022 and related events this June

Dr. Akihiro Kishimura received his B.S. degree under the supervision of Prof. M. Hidai from the University of Tokyo in 2000, and his PhD degree of engineering under the supervision of Prof. T. Aida from the University of Tokyo in 2005. He joined the research group of Prof. K. Kataoka in 2005 as a postdoctoral researcher, and became an assistant professor in Department of Materials Engineering, Graduate School of Engineering, The University of Tokyo in 2006. Then, he moved to Kyushu University as an associate professor in 2013. He joined Science Council of Japan (SCJ) in 2016, and worked as the chair of Young Academy of Japan (YAJ) from 2017 to 2020. He is keen on activities for sustainable development of academia and for bridging the academia and our society as a member of SCJ and YAJ. He is a member of the Global Young Academy from 2017. In 2020, he was appointed as the executive assistant to the president of Kyushu University. He is one of founders of Q-dai Science Communication Promoting Group (Q-string).
