## Urban and Campus Design

Chair: Assoc. Prof. Toshinori Tanaka (Research Promotion Coordinator of Q-AOS)

Using the Ito Campus and the Itoshima Peninsula as case studies, we will take a look at how the entire region worked together to create a city and a university. While regions all over the world are clawing their way to industrial development, Kyushu University in Fukuoka, located in western Japan near Asia, has been developing its campus as a stage to showcase its university reform, which was implemented ahead of other universities in Japan. The Kyushu University Ito campus was completed in 2018. The urban development of the surrounding area is currently underway, and we will introduce its plans, ongoing projects, and vacant house projects.
